

# Assignment

- The data for the assignment were all generated by random sampling from the normal (and multivariate normal) distributions. Assume the assumptions of ANOVA have been met for the purposes of this assignment (i.e., you don't have to test/report them). We'll cover how to test these assumptions in Semester 2.

**MMU talk by Chris Chambers:  
Thursday 6th December, 16:00-17:00, BR3.31  
(Brooks building).**

**“Registered Reports, five years on: A vaccine  
against bias in research and publishing.”**
