

# Visualise

**Data plots using `ggplot()`  
and `pirateplot()`**

# Visualising Your Data

- R has a number of in built graphics functions, but you're more likely to use functions from within the `ggplot2` and `yarr` packages. `ggplot2` is part of the `tidyverse` so if you have used `library(tidyverse)` then `ggplot2` will already be loaded.

```
> library(ggplot2)
```

```
> library(yarr)
```
