

Visualising Our Aggregated Data

```
> data_agg <- DV %>% group_by(Sentence, Context) %>% summarise_at("RT", c(Mean, sd), na.rm = T)
> colnames(data_agg) <- c("Sentence", "Context", "RT", "SD")
> ggplot(data_agg, aes(x = Sentence, y = RT, group = Context, colour = Context)) + geom_point() +
  geom_line()
```

Visualising as a Raincloud Plot
