

Good places to start looking for open data sets

- In your research area, there are likely to be large datasets that have already been published - or you could...

- Check out the Google dataset search toolbox:

<https://toolbox.google.com/datasetsearch>

- Or the gapminder datasets:

<https://www.gapminder.org/data/>

- Or the Kaggle datasets:

<https://www.kaggle.com/datasets>

- Or from any other source you might want to use! The data don't have to be psychological in nature.

A dataset

Using the Google dataset search, I looked for the World Happiness data - to download it, I had to create a free account (not always required):

<https://data.world/laurel/world-happiness-report-data>

The screenshot shows a web browser window displaying the Data.world dataset page for 'laurel/world-happiness-report-data'. The page includes a header with navigation links, a main content area with a 'Tables' section, a 'DATA DICTIONARY' section, and a '2 files' section. The 'Tables' section lists the source as 'Helliwell, J., Layard, R., & Sachs, J. (2017). World Happiness Report 2017, New York: Sustainable Development Solutions Network.' The 'DATA DICTIONARY' section provides a link to view all definitions for the 2 files and the 59 columns in the dataset. The '2 files' section shows a table with columns for 'wp5_country', 'country', 'year', 'life_ladder', 'log_gdp_per_capita', and 'social_support'. The table displays data for Afghanistan from 2000 to 2012. The right sidebar features a 'RECENT COMMENTS' section with user avatars and comments.

Nevermind, I see that Life Ladder is the Happiness Score

@kieronelli · 9 months ago
Is the 2016 data in the first sheet used to determine the 2017 scores?
