

Handy hints

- Co-ordinate activity - do this via the chair and via making it clear on hackmd.io what it is you are doing - make sure you all update the hackmd.io document as you go along - if you've completed an activity that you've put beside your name, write "COMPLETED".
- Remember the chair has to bring all your code together at the end so if you are changing variable names make sure you give the code on how you're doing that to the chair at the end.
- Any questions?
