

```

ggplot(economics, aes(x = date))
+ geom_line(aes(y = unemploy)) +
  labs(title = "Time Series
Chart",
        subtitle = "US
Unemployment Rate from
'Economics' Dataset",
        caption = "Source:
Economics",
        y = "Unemployment
(thousands)", x = "Date")

```

Animated Time Series Data

Now we're plotting Unemployment Size (transformed to Z-Scores) against Population Size (transformed to Z-scores) animated by Year.
