Handy hints

- Co-ordinate activity - do this via making it clear on hackmd.io what it is you are doing - make sure you all update the hackmd.io document as you go along - if you've completed an activity that you've put beside your name, write "COMPLETED".

- Remember I will bring all your code together at the end so if you are changing variable names make sure that's captured in the code you email to me.

- Any questions?
